TDD minutes

(PIER)

CEC and/or  
with letters  
SCE?

Paul: letter from TDD mfrs to LBNL to support  
Jasper case for research funding. This would be  
special funding beyond general LBNL support  
that has been provided to date.

- Concept: Minimum effective aperture  
(see Heschong-Mahone Group; LBNL)
- Goal: interim procedure
- Christian Kohler/Steve Selhowitz to advance this.
- LBNL will examine L/D ratios, test incidence  
angles, etc.
- Test procedure may also need to define  
solar altitude & solar azimuth

Willie: - advocated sharing of existing data  
Dan - roundtable on these results in Chicago.

Mike: - ATI testing being readied.

Momom - Mfrs with expired ratings: request an  
extension (needs IA approval).  
(6 months)

- New products: simulate only (U-factor).

HTDD testing

- Commercial hybrid 22" TDD
- Put definition in minutes.

VT of complex products

Willie: ~~Wait~~ Awaiting appointment of contractor.

- ATI preparing of RFP for bids
- ~~Anticipate testing start by early April~~ } Mike Thomas
- Window for clear skies testing April - September
- Testing to start Spring 2009.
- PMTG wrap: (Willie) Paul Jasper to assist in TG from now on.

Meeting closed @ 11:40 am.
