

## **Complex Product VT ILC Project Monitoring Task Group July 15, 2010 Meeting-Notes**

---

1. Willie and Ross chaired the opening section of the meeting.
2. The new VT algorithms provided by Dan State were discussed.
3. It was decided that the overall project experiment, its methodology, and the numerical results from the three labs compiled by LBNL should be written up and submitted to the PMTG for approval.
4. The proposed new VT calculation algorithm, based on measurements according to a draft IES recommended practice on skylight photometry, should be written up in a separate report and submitted by the TDD project team to the appropriate NFRC SC to go forward.
5. Attendees: Dan State, Ross McCluney, Willie du Pont, Gregg Vincent, Stacy Germann (staff)
6. Next conference call will be scheduled in 3 weeks.
