	<u>APPROVE w/ COMMENT</u>		

The CMA Labeling Task Group has developed a framing supplier label certificate format for use with the CMA Certification Program, to be used with the framing system.

I am confused by this label. This would seem to indicate that the framing system is being approved as a group of cross-sections. I am not opposed to this, but other items are indicating approval of each cross-section independently, so that the job-site specific arrangement of parts is used. Also, the generic table with the matrix is only applicable if the system parts are approved as a group.
