

# **Attachment Labeling Task Group Notes**

Monday, April 12, 2010

NFRC Spring Membership Meeting, New Orleans

Chair: Tom Morrissey – Hunter Douglas, Inc.

1. Tom Morrissey reviewed the concept label that was balloted.
2. Oval label negative - the board direction seems to dictate that the Oval label is impractical for the stated requirements
3. Hang tags are currently used in the Window Covering industry for safety related warnings - no place for a permanent label on the product itself - maybe on the box as in films
4. The numbers on the label can be removed and xx.xx format can be utilized.
5. Fully Open Fully Closed position may change over time, but was the simplest starting point for now
6. A HD engineer did state that a Black out product can be  $V = 0.00$
