- Fenestration Industry Category (specified)
- One slot open for election (3 year term)
 - Specifically for a manufacturer who sells the majority of its fenestration products or systems *for use in residential construction*.”

Steve Strawn Jeld-Wen, Inc.

I have been employed with JELD-WEN since 1990, currently with as Product Compliance Policy Manager, External Affairs, focusing on the policy side concerning codes and product regulations.

I have been involved with NFRC since 2001 and have accepted leadership positions as chairman of various Task Groups, Sub-Committees, and the Ratings Committee as well as currently serving on the NFRC board as Vice Chairman.

NFRC is entering an interesting crossroads as we consider ratings of many types of attachment products and the simplification of our current rating programs.

My goal as an NFRC Board Member representing the Residential Fenestration Manufacturers is to see that Attachment products ratings are appropriately developed and included in the program and bring about simplification where appropriate for our existing ratings program.
