

## **CMAST Complex Products Task Group**

Conference Call Notes

Thursday, July 9, 2009

4:00 – 5:00 p.m. EDT

Chair: Sneh Kumar

**Participants:** Sneh Kumar, Tom Culp, Charlie Curcija, Michael Thoman, John Lewis (staff), and Jessica Ferris (staff)

---

### **1) Meeting called to order at 4:05 PM**

### **2) Jessica Ferris appointed recording secretary**

### **3) Discuss Scope –**

The task group discussed the four following options or points of focus to consider/explore for the next task group call, which will serve as the basis of the task group scope:

- a) Expand/modify Table 4-3 to include basic/common complex products; e.g., slider over fixed.
- b) Develop a general rule of thumb that can be used for rating certain complex products
- c) Develop procedure for rating mullions
- d) On a specified project, when the configuration is unknown, there would be the option to model the frame as is; i.e., as a whole complex product. This would be isolated to the project – so a project-specific rating.

### **4) Next Steps –**

- a) The task group will look at **terminology** for the next meeting, so that everyone has the same reference point when discussing mullions, complex products, etc.
- b) Of the options referenced above
  - i) Sneh will work on Option A
  - ii) ??? will work on Option B
  - iii) Charlie Curcija on Option C
  - iv) Tom Culp will work on Option D

### **5) Next conference call schedule for July 17, 2009 @ 1:00 PM EDT.**

### **6) Meeting adjourned at 4:45 PM.**
