

December 3, 2008

### **Release 2.03**

In general, the things fixed in this version are:

- CPD 1.0 Addendums can be performed.
- The Frame and sash codes for CPD 1.0 Lab reports are now visible in a new info box
- Blank CR codes are now allowed
- Rounding of SHGC and VT should now be correct
- You can now see all products and lines if you select View all (vs. just active)
- Test Validate report matching has been improved to solve the issues causing Excel to not perform well
- Added E code when viewing published reports to indicate that some error occurred during product generation

If you have any questions please feel free to contact me at your convenience.

Best regards,

Scott R. Hanlon
