Release 2.04

In general, the things fixed in this version are:

- Temporary Product Line Date Editing
- CAR Data corrections
 1. Recertification dates only show when the Current Cert date is populated AND it is different from the initial cert date.
 2. SHGC and VT columns should contain a dash "--" if the SHGC or VT (COG) is equal to ZERO to represent no rating for that individual product
- Upload Sheets with missing 0/1 data should now work.
- SIM Only Lab reports protocols are in place
- Everything from previous releases that has been corrected

If you have any questions please feel free to contact me at your convenience.

Best regards,

Scott R. Hanlon
