2. Appoint Recording Secretary (NFRC Staff)
3. Approve Minutes from CPC - Conference Call – August 23, 2004

Move to approve the minutes second by Jim K. Vote: 3-0-0

4. Forum: rating and labeling dynamic glazing products

John provided the background about why the fourm is organized. There are several product that fit in the category and NFRC needs to start thinking of how to rate the products.

- a. (Joe Hayden, Pella, between glass blinds; Dick Troyer, ATI, visible transmittance; Chuck Hayes, Sage; electrochromics)
  - i. - ratings : should there be multiple rating points; if so, how many and what points
  - ii. - labeling: should there be multiple ratings on the label

## DRAFT MINUTES – 10/13/04

Joe Hayden:

Joe Hayden displayed a product that had between glass blinds. Point is how to rate the products, blind open, close or ant angle. All this functions impact the energy rating.

Randy thought that there should be a single number.

Joe mentioned that marketing people did not give a good answer.

Mike Thoman: how the product will meet the code requirements..

How will the product be rate, which orientation etc.

How will product perform for HVAC.

Jim K. Noted that NFRC has to provide rating numbers to compare products in the market place.

How are this product be simulated. LBNL is working on incorporating simulating between blinds into WINDOW.

Chuck (Sage): Dynamic glazing by means of electro chromic glazing. Showed the example label that list the rage of performance.

Charlie C. mentioned that there may be other dynamic component

### 5. Old Business
