

The following policy shall apply to all NFRC Technical Procedures, Program Documents, supplemental documents and other applicable tools:

#### Policy for Metric/Inch-pound in NFRC Procedures and Documents

1. SI units (Metric) shall be listed first, with inch-pound in parentheses:  
X.XX (X.XX)
2. SI units (metric) shall be the primary unit unless otherwise specified.
3. The converted number shall carry the same level of precision as the primary number.
4. Conversion from SI units (metric) to inch-pounds shall be to the same precision. (IEEE/ASTM SI 10-1997)
5. For rating purposes, using NFRC-approved simulation software tools, the rounding shall only be performed on the rating after the rating has been determined in metric units and the calculations, including conversions, are complete.
6. Rounding of numerical values shall be per IEEE/ASTM SI 10-1997 and all subsections except section 5.4.1.3.
7. Conversion factors used shall be those documented in IEEE/ASTM SI 10-1997.
