

3/3/08

Notes: For internal Task Group

Lead by Mike Cienian

1. Scope Discussion - The scope statement was rewritten to match the external Task group. The wording was revised to use the wording "interior" and to exclude the wording "intergal" which is thought to be part of the "between the windows" type product.
2. Christian Kohler presented the example of product categories used on the "Windows 6" software. The Task group will be further defining these categories.
3. Mike Cienian introduced the WCMA (Window Covering Manufacturers Association) to the NFRC. WCMA will be kept abreast of these NFRC developments.
