- c. Antitrust reminder
- d. NFRC Meeting Guidelines

2. Appoint Recording Secretary (Joe Hayden)

3. Agenda reviewed and approved

4. Unfinished Business

5. New Business

- a. Review Label Certificate Ballot Responses –

i. Required Label Certificate Info:

1. QTI Negative: Potential for conflict with redundant ballots. Negative withdrawn by QTI.
2. WESTLab Negative: Too much information on the label. Concern that including “Qty” and “Total Area” may be misleading as it may lead building officials to incorrectly assume they could use this for a “UA” calculation. Remove “Qty” and “Total Area” entries from the required information. Keep that information in the Optional section (to recommend to the SC).

ii. Optional Information Info:

1. WESTLab Negative: What is the value of the Area Weighted values at the top of the page? Without knowing the orientation these values may be misleading. It was noted that ASHRAE does allow this.
 - Recommend moving the table to the top of the page, move the area weighted average values to the bottom, and add to the note that the area weighted average values do not account for orientation.
 - Remove area weighted SHGC and VT entirely. (Keep SHGC and VT in the table)
 - Add note that the ratings at actual size were determined per NFRC technical procedures, but are not certified ratings.
 - Jeff Baker and Tom Culp will draft proposed language.
