

NFRC 700 Private Labeler Ballot [\(click here to access the original proposed ballot\)](#)

NFRC Ballot Comments through November 2, 2009 Ratings Committee – Certification Subcommittee

Legend:

AC: Approve with Comment

NEG: Negative response with Comments

Company Name, Rep Initials	AC/NEG	Section and/or Page #	Comment/Alternate Language
Architectural Testing, M.T.	NEG	General	A private labeler should not be allowed to make modifications to a product at their site. By definition, they are having a product manufactured by another entity and labeling at their own. If they are modifying the product, then they become a manufacturer. A prehanger, is a manufacturer, not a private labeler, since they are manufacturing a frame, assembling the door slab with a glass lite and frame. This language is not appropriate and should be rejected in whole.
