RE: New CPD 2.0 Release for Recertification

Hi Everyone:

This memo is to inform you that a new release has been posted to the production server dealing with Recertification report types.

- The CPD numbers for individual products uploaded as a Recertification report type will be automatically added to the end of the existing certified product line when accepted by the IA.
 - When the recertification upload sheet is accepted and the product line is generated, the previous individual products will be archived and the application will automatically apply the accepted individual products to the next available CPD number. The simulation lab is not required to have the next available product number in the spreadsheet as previously indicated in the simulation manual.

If you have any questions please feel free to contact me at your convenience.

Best regards,

Scott R. Hanlon
