

Notes

Swinging Door TG – Tucson Membership Meetings

March 2, 2009

TG start: 11:00 am

Dave De Block the vice chair welcomed all and reviewed antitrust in Steve's absence.

All changes for doors in NFRC 100 were approved with one negative.

Reviewed negative from QTI ballot-

QTI will withdraw negative at SC at request that sidelight glass width size is reviewed.

Recommendation that sidelights sizes go to 16" in width overall. However, concerns from those in attendance was that this would cause sidelights to exceed Energy Star requirements when they currently meet Energy Star at the current model size of 24" x 79".

Discussion to eliminate  $\frac{1}{4}$  and  $\frac{3}{4}$  lite options from the door matrix label. Canada uses only a full lite.

This will evolve with the DOE's change to Energy Star and this will be discussed in July.

Meeting adjourned at 11:33 am.
