Meeting Notes:

Re: Curb-mounted skylights

2" x 4" wood curbs w/ no allowance for flashing, etc.  
- this is not seen by the mfr.

- do we need a survey to define what is  
a typical curb?

- alternatively, could the mfr define the  
curbs & have it included in the skylight  
modeling?

- Need RFP to address curb assemblies  
& identify common practice in US  
residential ~~manufacturing~~ market.
