Conference Call

Notes

Spacer Thermal Performance Task Group

Monday, September 11, 2006

3:00 – 4:00 PM (EST)

Chair: *Werner Lichtenberger – TruSeal*

1. Call to order @ 3:00 PM (EST)

- a. M. Jhaveri, M. Bhandari, J. Baker, W. Lichtenberg, J. DeVoogd, D. Raske, M. Thoman

2. Scott Hanlon (NFRC Staff) appointed recording secretary

3. Old Business

- a. Reviewed TruSeal's letter to spacer rating committee –
 - The intent is to provide a smoother means to provide documentation to the IA about the component substitution change without going through the process of changing the upload sheet and adding these new products to the database and not using the entire product simulation, such as one cross-section. The manufacturer is willing to not display the new product in the database; however, they must be able to label the product. When the IA inspects them, the documentation from the simulation lab allows the certification of the product. When the manufacturer re-certifies, the component substitution is incorporated into the matrix and database.
 - Scott to inform Jim Benney that the Request for Exemption form will be sent forth based on a glass exemption and a spacer exemption.
 - Scott to email Exemption procedure & form to group.

4. Adjourn at 3:40

SCOPE

*To provide oversight to the resolution of the outstanding technical issues related to the CMA
Spacer Grouping procedure.*
