

## **NFRC Successfully Concludes ANSI Executive Standard's Council SC on Accreditation Ballot and Moves to Final ANSI Accreditation Ballot**

The ANSI Executive Standards Council's Subcommittee on Accreditation (SC-A) has completed its letter ballot review of *NFRC-710-Operating Procedures Manual* and returned several comments. NFRC responded to the comments satisfactorily on July 27. ANSI will now ballot *NFRC-710-Operating Policies Manual* to the ANSI Executive Subcommittee for 30 days and return comments. This ballot is likely to conclude at the end of August. Once NFRC responds satisfactorily to any ANSI Executive SC comments, NFRC will become an ANSI Accredited Standards Developer. Immediately thereafter, NFRC will submit *NFRC 100-Procedure for Determining Fenestration U-factors* and *NFRC 200-Procedure for Determining Fenestration SHGC and VT at Normal Incidence* for full ANSI accreditation.
